DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the satellite dish recited in claim 1 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2817

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the satellite input terminal " in lines 2 and 8. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Shoemaker et al US Patent 5,793,336, disclose conformal antenna assemblies comprising an outer conductor has gap which ungrounds the outer conductor at the end terminal so that the outer conductor is a second antenna portion sensitive to a VHF band of frequencies.
- Snyder US Patent 5,929,818 discloses a combination satellite dish with UHF/ VHF antenna comprising an UHF/VHF antenna.
- Kual US Patent 5,933,123 disclose a combined satellite and terrestrial antenna that comprises an electrical connector attached to and in electrical contact with the metal of the dish and a transmission line extending for the connector to transmit UHF/VHF signals received by the metal dish.
- Crosby US Patent 5,999,137 discloses an integrated antenna system for satellite terrestrial television reception comprising elements of a VHF/UHF
